

Take the pain out of points

What is Professional Development Training for Farmers?

Professional Development Training for Farmers is a structured approach to training. For each of the past ten years these highly successful training groups have delivered full allocation BASIS and NRoSO CPD points for participants.

How does it work?

The training is run as five day long events, mostly over the winter months. Themes and subjects are suggested by the groups themselves but topics typically cover a wide range of agronomic, environmental, legislative and emergent issues.

Training is delivered through NIAB TAG specialists in conjunction with Prime Agriculture. A range of external industry experts are also used to deliver training on specific subjects.

Who can take part and where do the groups meet?

The training is open to all farmers and the groups meet in Cambridgeshire and Suffolk. Small inclusive sessions with good opportunity for discussion are fundamental to the success of this programme; but this also means space is limited.

Group members are encouraged to attend a specific venue, but participants can attend either location to suite their own availability.

How much does the Professional Development Training cost?

The cost of the Professional Development Training for Farmers is £355 (+VAT) for all five meetings; including lunch and course notes where appropriate.

Our training programme is supported by *The Felix Thornley Cobbold Trust*
