

Course details

The course is aimed particularly at the needs of candidates wishing to become licensed seed samplers, but anyone concerned with good sampling practices will find it of interest. The course includes comprehensive training in both the theory and practice of sampling techniques. Included in the syllabus will be a background to seed certification procedures and detailed guidance on the official requirements for labelling, bag sealing and other duties of licensed samplers. The course will conclude with an examination in theory and practical. Success in the exam is recognised by Fera as the qualification required for the issue of an official seed sampler's licence. **Candidates are advised that they are expected to pass all sections of the exam.**
